4. Fairs will not accept Sheep & Goats from scrapie-infected or source flocks, or animals that have been exposed to scrapie unless they have been evaluated and approved for exhibition by the State Scrapie Epidemiologist.
5. Fairs will keep records of the consignor, buyer, and animal identification for 5 years when animals change ownership at the Fair.
6. Fairs will try to accommodate Scrapie Flock Certification Program Members with separate space if practical. Breeding animals should be housed in separate enclosures or locations from animals that are not in the certifications program, if practical.
7. Sheep or Goats within 30 days of pre- or post-parturition, or with vaginal discharge, shall, if practical, be kept separated from animals from different flocks and in an area that can be properly cleaned and disinfected.
8. Rams/Bucks older than 6 months require a negative Brucella Ovis test within 30 days of entry into California.

In an effort to prevent the spread of disease, Shasta District Fair will not allow Sheep or Goats within 30 days of pre- or post-parturition, or with vaginal discharge from entering in the Fair.

SLICK SHORN: All market Sheep will be clean, and slick shorn from the knees up (including head) prior to being weighed. Sheep with excessive wool will not be weighed until shorn to the satisfaction of Show Management. Any sheep not meeting these requirements will not be eligible to show or sell.

SHEEP TAIL DOCK: To qualify for exhibit market Sheep must be docked such that the tail (dock) is healed and can be lifted from the exterior. Sheep that have no dock will not be eligible. Acceptable tail dock is determined by placing a ¼" round stock (like a pencil) beneath the Sheep's dock. When pressure is applied and the tail lifted up, some resistance should be felt due to the presence of tailbone (vertebrae). **All Sheep will be checked prior to weighing by Fair designated veterinarian. Animals that do not meet this test will be sifted by the Fair designated veterinarian. All decisions are final.**

SURVEILLANCE OF SHEEP: All Sheep will be checked during the weigh in process by a Veterinarian for any evidence of Club Lamb Fungus and Heavy Muscled (Callipyge) Mutation. These Sheep have no ready market value and are deemed undesirable; therefore, they must be removed immediately from the Fairgrounds. If any discrepancies arise on the Club Lamb Fungus and the Callipyge Mutation Lamb, a Fair designated veterinarian's decision will be final. All sheep and goats will be checked for yearling teeth.

MUZZLES: All animal muzzles are prohibited at the Fair. Muzzles are unnecessary for animal well-being.
